SUMMARY

Frontend architect who combines **micro-frontend platforms** with **production agentic AI** (Python/FastAPI, LangChain, Pinecone). **11+ years** building enterprise web platforms for tier-1 banking and asset-management clients, with a record of faster releases (**+35%**), better AI retrieval (**+34%**) and fewer regressions (**-48%**). **500+ technical interviews** conducted; mentor and technical writer.

SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, Vue.js, Redux, GraphQL, Web Components, Lit, Webpack, Vite, Storybook, Tailwind

Architecture: Micro-Frontends, Module Federation, Multi-Tenant UI, Design Systems, Nx Monorepo, SSR, Service Workers, HLD/LLD

Backend & AI: Python, FastAPI, Node.js, Express, LangChain, CrewAI, Pinecone Vector DB, Multi-Agent Systems, REST

Cloud & QA: AWS Lambda/ECS, Docker, CI/CD, OAuth, OPA, Playwright, Cypress, Jest, PyTest

EXPERIENCE

Lead Frontend Engineer & Architect | Publicis Sapient

2023 – Present

Led a team of 5–6 engineers; technical owner for frontend standards, HLD/LLD and governance.

- **Lloyds Banking Group:** Led a multi-tenant React + Module Federation MFE platform; release velocity **+35%**.
- **AI troubleshooting:** Embedded multi-agent AI widgets that resolve client-side failures in under 1 minute.
- **Apollo.com:** Built Python/FastAPI ingestion into Pinecone with semantic caching; retrieval accuracy **+34%**, lower LLM cost. *Stack: Python, FastAPI, LangChain, Pinecone, Vue.js, Node.js.*
- **Glove UI Library:** Created a white-label enterprise design system; time-to-market **-35%**.
- **Platform:** Introduced Nx monorepo (productivity **+20%**) and service-worker OAuth token isolation against XSS.
- **Standards:** Set Next.js/TypeScript rules with performance budgets, Core Web Vitals and accessibility checks in CI.
- **Leadership:** Mentored a 5–6 member team and ran in-house React, Next.js and agentic AI sessions.

Senior Member of Technical Staff | Vymo

2020 – 2023

Senior SME leading system design reviews and performance budgets across product verticals.

- **Low-code UI transpiler:** Built a JSON-to-UI engine for n-level nested schemas; feature delivery time **-50%**.
- **Schema tooling:** Added Monaco Editor authoring, validation and automated version-control snapshots.
- **Quality gates:** Pre-commit hooks cut production regression bugs by **48%** in two quarters.

Senior Software Engineer | Ranosys

2015 – 2020

Full-lifecycle engineer modernizing legacy presentation layers into decoupled single-page applications.

- Migrated fragmented legacy frameworks to React, improving Core Web Vitals and mobile-first responsiveness.

OPEN SOURCE, WRITING & MENTORSHIP

- **AsriUI:** accessible, typed React component library with SSR and tree-shakable exports (github.com/GAjay/asriui).
- Medium series on config-driven UI, runtime component registries, tenant-aware routing and Zod validation; in-house React, Next.js and agentic AI programs; 1:1 mentoring on Topmate.

EDUCATION & LANGUAGES

B.E., Electronics and Communication Engineering, 2016 | **Languages:** English (professional), Hindi (native)
